

We welcome you to join us for the NLN Clinical Focus Group - Start Strong facilitated by a panel of NLN Expert Clinicians.

This group was created as part of our upcoming Mentorship Program that will be fully released this summer. This is a platform for newly certified lymphatic therapists to ask questions, present cases, and continue to learn about various topics as they navigate through their first year after certification. A group of NLN Expert Clinicians will facilitate the meetings. All lymphedema therapists of varying settings, geographic location, and discipline are welcome.

We encourage submission of questions or topics for discussion via email at continuingeducation@lymphnet.org.

These are not recorded, therefore they are not accessible at a later date.

The National Lymphedema Network Expert Clinician program was developed to elevate the standards of therapeutic care being provided to patients with lymphatic diseases by implementing a live competency-based assessment on multiple facets of current lymphatic treatment. To qualify for this program, clinicians need to have been working in the field of lymphology for a minimum of five years, and maintain a caseload of patients with lymphatic disease for at least 75% of their regular schedule. If a clinician successfully passes the competency assessment, there are rigorous standards of continuing education to maintain the designation annually.
